B.13	Recent events materially relevant to evaluation of Issuer's solvency	<p>1/ Office of Foreign Asset Control (OFAC) Following discussions with the US authorities, on 20 October 2015, Crédit Agricole S.A., the Crédit Agricole Group and Corporate Investment Bank (Crédit Agricole CIB) reached agreements with the US federal authorities and the State of New York in connection with the investigation of a series of dollar-denominated transactions with countries under US economic sanctions and subject to certain laws of the State of New York. The events covered by this agreement took place between 2003 and 2008. Crédit Agricole CIB and Crédit Agricole S.A., which cooperated with the US federal authorities and the State of New York during the investigation, agreed to pay a fine of US \$787 million. The payment of this fine was charged against existing provisions. Crédit Agricole S.A. and Crédit Agricole CIB also reached agreements with the Board of Governors of the US Federal Reserve and the Department of Financial Services of the State of New York. Crédit Agricole CIB reached an agreement with the Office of Foreign Assets Control of the US Department of the Treasury. It also signed three-year suspended prosecution agreements with the US Attorney's Office of the District of Columbia (USAO) and the District Attorney of New York (DANY). The USAO and DANY agreed to drop the charges resulting from the investigation against Crédit Agricole CIB, Crédit Agricole S.A. and Crédit Agricole CIB's subsidiaries and affiliates, provided that Crédit Agricole CIB complies with the obligations imposed upon it under the agreements. Crédit Agricole S.A. Group agreed to tighten its internal procedures and policies on regulatory compliance with international sanctions. It will continue to cooperate fully with the US federal authorities and the State of New York in connection with the case, and with the European Central Bank, the French Regulatory and Resolution Supervisory Authority (ACPR) and regulators throughout its global network.</p> <p>2/ Switzerland/US programme As part of the agreement signed between Switzerland and the USA in August 2013 to enable the US authorities to examine the business conduct of Swiss banks with respect to US taxpayers, Crédit Agricole Suisse, which had voluntarily accepted to participate in the US tax programme in December 2013, signed a Non-Prosecution Agreement with the US Department of Justice on 15 December 2015. Under the terms of this agreement, Crédit Agricole Suisse paid a fine, fully provisioned, of US \$99 million. Crédit Agricole Suisse also committed to complying with various obligations assigned to it and to cooperate with the US authorities. Full impairment of CACIB's stake in UBAF CACIB holds a 47.01% stake in UBAF, valued at €156million at 31 December 2014. In 2015, this holding was fully impaired to take account of UBAF's negative financial outlook due to recurring difficulties (geopolitical crises and oil prices).</p> <p>3/ Full impairment of CACIB's stake in UBAF CACIB holds a 47.01% stake in UBAF, valued at €156million at 31 December 2014. In 2015, this holding was fully impaired to take account of UBAF's negative financial outlook due to recurring difficulties (geopolitical crises and oil prices) affecting its main areas of operation (Middle East and North Africa).</p> <p>4/ Proposed sale of CA Securities Taiwan On 31 July 2013, Crédit Agricole CIB withdrew from the brokerage business, with</p>

		<p>notably the disposal of the CLSA BV Group to CITICS. Since Taiwanese law prohibits ownership of more than 30% of a Taiwanese company by Chinese (PRC) interests, CLSA's operations in Taiwan were hived off and sold to Crédit Agricole Securities Asia BV. In the CLSA BV sale contract, Crédit Agricole Securities Asia BV agreed to maintain brokerage operations in Taiwan for two years. An agreement for the sale of the securities was signed with a new counterparty in the second quarter of 2015. The structure was amended in the third quarter of 2015 in keeping with the recommendation of the Taiwanese regulator. This sale is currently being validated by the local authorities. As IFRS 5 criteria have been met, the entity has been recognised in discontinued operations. The disposal will take place at the net carrying amount of the asset. There is thus no accounting impact on the 2015 financial statements.</p> <p>5/ Implementation of IFRIC 21 The clarifications on the accounting of taxes and other government levies given in IFRIC Interpretation 21 are described in Note 1 "Group accounting policies and principles, assessments and estimates". This interpretation of IAS 37 "Provisions, contingent liabilities and contingent assets" mainly concerns the obligating event, and thus the date of recognition of a liability in respect of a tax (excluding income tax as defined in IAS 12 "Income Taxes"). As IFRIC 21 is applicable retrospectively, the data published at 30 June 2014 and 31 December 2014 was restated accordingly; the main impacts of these adjustments are presented in Note 11.</p> <p>6/ Single Resolution Fund The Single Resolution Fund (SRF) was established by Regulation (EU) no. 806/2014 as a single funding mechanism for all Member States participating in the single supervisory mechanism (SSM) established by Council Regulation (EU) no. 1024/2013 and in the Single Resolution Mechanism (SRM). The SRF is financed by the banking sector. The target level of the Fund is 1% of the amount of deposits covered by the Deposit Guarantee Fund and must be reached by 31 December 2023. 70% of the contribution to the resolution fund is payable in cash, in the form of an annual contribution. The remaining 30% is the subject of an irrevocable payment commitment, collateralised through a cash security deposit held by the Fund. The deposit will be held for the duration of the commitment. It is repayable at maturity. Thus, for the year 2015, Crédit Agricole CIB Group paid €77 million in respect of the annual contribution, recognised in the income statement in taxes other than on income or payroll-related.</p> <p>7/ Issue of undated deeply subordinated bonds by Crédit Agricole CIB On 16 November 2015, as part of the process designed to strengthen the Group's regulatory capital, Crédit Agricole CIB launched three floating-rate perpetual subordinated Additional Tier 1 bonds for a total of €1.8 billion (i.e. three issues of €0.6 billion each). These perpetual deeply subordinated bonds, which include discretionary clauses concerning the payment of interest, are classed as equity instruments under IFRS and recognised in Share capital and reserves at 31 December 2015 (see Change in shareholders' equity). The interest paid and the issue premiums are deducted from equity. Pursuant to IAS 12, the tax saving resulting from the payment of interest is recognised in net income for the period so long as this tax is not withheld at source and the interest paid is deducted from Crédit Agricole CIB's retained earnings. In accordance with the European CRD 4/CRR regulation, these bonds are included in the calculation of Additional Tier 1 capital of Crédit Agricole CIB Group.</p>

Section D – Risks																		
D.2	Key risk factors relating to the Issuers	The following key risk factors relating to the Crédit Agricole CIB as Issuer, its activities, the market in which it operates, and its structure may affect the capacity of the Issuer to fulfil its obligations under the Securities issued under the Programme: - Creditworthiness of the Issuer The Securities constitute general and unsecured contractual obligations of the Issuer and of no other person, which will rank equally with all other unsecured contractual obligations of the Issuer, and behind preferred liabilities, including those mandatorily preferred by law. Securityholders rely upon the creditworthiness of the relevant Issuer and no other person. - Credit risk Credit risk is the risk that a customer or counterparty will be unable or unwilling to meet																

		<p>a commitment that it has entered into with Crédit Agricole CIB.</p> <ul style="list-style-type: none"> - Liquidity risk <p>Liquidity risk is the risk that Crédit Agricole CIB will encounter difficulty in realising assets or otherwise raising funds to meet commitments.</p> <ul style="list-style-type: none"> - Interest rate risk <p>Exposure to interest rate risk is the risk that arises when there is an imbalance between rate and non-rate sensitive assets, liabilities and off balance sheet items.</p> <ul style="list-style-type: none"> - Foreign currency risk <p>Foreign currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. Crédit Agricole CIB foreign exchange exposure arises from issuing debt in currencies other than Euro.</p>
D.6	<p>Risk warning that investors may lose value of entire investment and key risk factors relating to the Secutities</p>	<p>The Securities involve a high degree of risk. Investors should recognise that their Securities may mature worthless and should be prepared to sustain a total loss of the purchase price of their Securities. Investors should be experienced with respect to options and option transactions, should understand the risks of transactions involving the Securities and should reach an investment decision only after careful consideration, with their advisers, of the suitability of such Securities in light of their particular financial circumstances.</p> <p><i>Potential losses arising on redemption</i></p> <p>Investors should be aware that the Final Redemption Amount may be less than the nominal amount of the Securities.</p> <p><i>Payments linked to an underlying asset</i></p> <p>The Linked Interest Amounts and Redemption Payoff in respect of the Securities are linked to the value of the Underlyings. Investors should therefore appreciate that they are taking a view on the value of the Underlyings as it is used for the purposes of determining the Linked Interest Amounts and Redemption Payoff.</p> <p>Investors should be aware that:</p> <ul style="list-style-type: none"> (i) the market price of the Securities may be volatile; (ii) movements in the Underlyings may adversely affect the amount of nominal and interest to be paid on the Securities and may also affect the market value of the Securities; (iii) they may receive no interest; (iv) payment of nominal or interest may occur at a different time or in a different currency than expected; (v) the amount of nominal to be repaid may be less than the stated nominal amount of the Securities or may even be zero; (vi) an Underlying may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices; and (vii) the timing of changes in an Underlying may affect the actual yield to investors, even if the average level is consistent with their expectations. In general, the earlier the change in an Underlying, the greater the effect on yield. <p><i>Structured payments</i></p> <p>The Securities are structured such that the amounts payable in respect of interest are subject to a cap and floor. The market value of the Securities may therefore be even more volatile than those for securities that do not include those features.</p> <p>Small changes in the value of the Underlyings may have disproportionate consequences</p>

	<p>on the Interest Amounts paid in respect of the Securities.</p> <p>The effect of a cap or floor, or a combination thereof, may mean that the investor will not fully participate in any positive performance of the Underlying(s) and any payments in respect of the Securities will be lower than they would have been without a cap.</p> <p><i>Amounts payable determined by reference to a formula</i></p> <p>Amounts payable in respect of the Securities are determined by reference to formulae, as described in the Elements above. The Securities therefore entail significant risks not associated with similar investments in a conventional debt security. Investors should fully understand the basis on which payments in respect of the Securities will be determined in accordance with the applicable Conditions and should appreciate that neither the current nor the historical value of the Underlyings should be taken as an indication of future performance of Underlyings.</p> <p><i>Ranking of the Securities</i></p> <p>The Securities constitute general, unsecured, contractual obligations of the Issuer and of no other person. Any person who purchases such Securities is relying upon the creditworthiness of the Issuer and has no rights under the Conditions against any other person.</p> <p><i>Conflicts of interest</i></p> <p>Certain potential conflicts of interest exist or may arise between Securityholders and certain other parties, which have the potential to adversely affect Securityholders.</p> <p><i>Compounding of risks</i></p> <p>Various risks relating to the Securities may be correlated or compounded and such correlation and/or compounding may result in increased volatility in the value of the Securities and/or in increased losses for Securityholders.</p> <p><i>Legal and tax risks</i></p> <p>Certain risks arise as a result of applicable law (including applicable tax law) which have the potential to adversely affect Securityholders.</p> <p><i>Trading Securities in the secondary market</i></p> <p>Securities may have no established trading market when issued, and one may never develop.</p> <p>If a market does develop, it may not be very liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with their anticipated yield or a yield comparable to similar investments that have a developed secondary market.</p> <p><i>Credit ratings</i></p> <p>Credit rating agencies may assign credit ratings to the Securities. The ratings may not reflect the potential impact of all the risks and other factors that may affect the value of the Securities. A reduction in the rating, if any, accorded to the Securities, or of the outstanding debt securities of the Issuer could result in a reduction in the trading value of the Securities.</p> <p><i>Payments in the Interest Currency</i></p> <p>The nominal amount of the Securities is denominated in USD. Investors who calculate their investment performance in EUR are exposed to the risk of unfavourable change in the EUR/USD exchange rate (due to <i>inter alia</i> the devaluation of USD) and to the risk that authorities with jurisdiction over EUR may impose exchange controls. Therefore they may receive an Interest Amount in EUR which is lower than an Interest Amount calculated on the basis of a nominal amount denominated in USD at the Issue Date.</p>

		<p>Payments in the Redemption Currency</p> <p>The nominal amount of the Securities is denominated in USD. Investors who calculate their investment performance in EUR are exposed to the risk of unfavourable change in the EUR/USD exchange rate (due to <i>inter alia</i> the devaluation of USD) and to the risk that authorities with jurisdiction over EUR may impose exchange controls. Therefore they may receive a Final Redemption Amount in EUR which is lower than the initial nominal amount denominated in USD at the Issue Date.</p> <p>The capital invested in the Securities is at risk. Consequently, the amount a prospective investor may receive on redemption of its Securities may be less than the amount invested by it and may be zero (0).</p>
