Balances of allowances as of 31st Dec 2018 and as of 30th Jun 2018 refer to expected credit losses following the transition to IFRS 9.

截至 2018 年 12 月 31 日及 2018 年 6 月 30 日的金額是過渡至國際財務報告準則第 9 項之預期信用損失撥備。

Other than the above impairment allowances which have been made locally, our Head Office takes a dual approach to general country risk provisioning, which is determined on the basis of a risk rating assigned by the Country Rating Committee using a multi-criteria analysis (economic, financial and political), and another risk weighting assigned per type of commitment. These two criteria determine the contribution of each of the bank's commitments to the global country risk provision.

除了上述在香港分行的減值準備外，海外總行對於一般性債務國風險是根據兩項準則作出撥備。風險評級一方面由內部組成的國家評級委員會在分析經濟、財務、政治等多項因素後作出，而另一方面則按個別風險承擔的類別劃分。這兩項評級標準決定香港分行的每項風險承擔在全球性整體債務國風險準備金內所佔的比重。

Liquidity Risk Management

Liquidity risk is the risk that a financial institution becomes unable to meet its financial obligations as and when they fall due. Credit Agricole CIB Group (covering its Head Office in France and its international network like Hong Kong Branch) could be exposed to the risk of not having sufficient funds to honor its commitments. The risks could for example be realized in events like a mass withdrawal of customer or investor deposits, during a confidence crisis or even a general liquidity crisis in the market (access to interbank, monetary and bond markets).

The Group has devised and implemented liquidity risk management framework, managed at group level and at local level, which relies on five liquidity centers worldwide, amongst which Hong Kong Branch is one of them. Liquidity risk is managed through maintaining liquidity reserves, organizing its funding activities (e.g. limitation on short-term funding, staggered scheduling of long-term funding, diversifying sources of funding) and balanced growth in the assets and liabilities of its balance sheet. A set of limits, indicators and procedures are used to ensure liquidity risks are identified and followed up on timely basis. In addition, the internal approach incorporates compliance with all local regulations on liquidity.
