

IT Division

The IT Division at Crédit Agricole CIB covers all the IT departments in charge of designing, developing and operating the Bank's Information Systems (IS) and technological infrastructures.

The IT Division is a major component of the Bank in France and abroad. It acts on strategic projects and advises the various business lines on their digital advances, by suggesting innovative solutions.

The IT Division is a veritable partner working alongside the Bank's business lines. Its organisation is in line with that of the business lines it assists, so that it can best meet their needs and expectations.

More than 20 jobs within IT Division, the opportunity to build a career in accordance with your aspirations.

* internals and externals

Some of the positions we offer

PROJECT MANAGER

You steer and coordinate IT projects, both in technical and functional terms.

Your tasks:

- ▶ to be in charge of the project definition phase by analysing the business line's needs and requirements;
- ▶ to lead the teams involved in the projects and coordinate their actions;
- ▶ to steer the various stages of the projects, monitor costs, schedules and deliverables;
- ▶ to inform of and manage the projects' risks;
- ▶ to monitor the quality of deliverables;
- ▶ to prepare and lead the steering committees;
- ▶ to regularly report on ongoing projects.

DEVELOPER

You help design and develop applications and software packages and act on the various stages of an IT project.

Your tasks:

- ▶ to contribute to defining the technical and application architecture;
- ▶ to validate the detailed technical specifications;
- ▶ to contribute to designing, developing and testing such specifications;
- ▶ to guarantee that the developments are in line with the performance, stability and upgrade technical restrictions;
- ▶ to guarantee quality insurance processes.

BUSINESS/MOA ANALYST

You work with the various CACIB business lines on developing and upgrading their information systems, by collating the business line's issues and translating them into IT issues.

Your tasks:

- ▶ to correctly define new functions before launching the analysis;
- ▶ to understand and draft the statement of requirements;
- ▶ to draft the functional specifications;
- ▶ to draft the technical validation reports;
- ▶ to monitor the MOA schedule.

SUPPORT ANALYST

You assist users with their application's support.

Your tasks:

- ▶ to monitor deliveries in production of projects;
- ▶ to communicate with users;
- ▶ to perform the functional tests;
- ▶ to analyse technically and functionally the production problems;
- ▶ to draft the functional specifications for production problems.

CANDIDATE PROFILES
