

Innovation and digital transformation

The IDT Filiere has the mission to support Crédit Agricole CIB in the definition and implementation of its digital transformation. In order to carry out these missions, a small IDT team of employees relies on all the Bank's core strengths, in France and internationally.

IDT Filiere relies on five pillars (data architecture, expertise, digital watch, digital projects and ecosystem animation). The diversity of projects within this team makes it possible to develop innovative ideas and contribute to Crédit Agricole CIB's digital culture.

Innovation Digital transformation

Digital expert Facilitator

Artificial intelligence Big Data

Blockchain Agile

Change management

Transverse team

6 countries :

France, Italy, USA, India, Hong-Kong, London, Japan
