The IDT Filiere has the mission to support Crédit Agricole CIB in the definition and implementation of its digital transformation. In order to carry out these missions, a small IDT team of employees relies on all the Bank’s core strengths, in France and internationally.

IDT Filiere relies on five pillars (data architecture, expertise, digital watch, digital projects and ecosystem animation). The diversity of projects within this team makes it possible to develop innovative ideas and contribute to Crédit Agricole CIB’s digital culture.

- Define a data-driven strategy and roadmap.
- Set up an operational governance to follow the transformation.
- Ensure collaboration for digital transformation within CIB’s divisions and with Crédit Agricole Group.
- Set up a transversal watch on digital that will identify emerging and disruptive topics, key opportunities and potential threats for the Bank.

**BUSINESS LINES**

- **DATA ARCHITECTURE CONVERGENCE**: Management of digital and innovative projects to create products and services with new business models, that need to grow with different organisation to optimise chances of success.
- **DIGITAL PROJECTS**: Ensure collaboration for digital transformation within CIB’s divisions and with Crédit Agricole Group.
- **ECOSYSTEM ANIMATION**: Set up a transversal watch on digital that will identify emerging and disruptive topics, key opportunities and potential threats for the Bank.
