Balances of impairment allowances as of 30th Jun 2026 and 31st Dec 2025 as of refer to expected credit losses following the transition to IFRS 9.

截至 2026 年 6 月 30 日及 2025 年 12 月 31 日的減值準備金額是過渡至國際財務報告準則第 9 項之預期信用損失撥備。

Other than the above impairment allowances which have been made locally, our Head Office takes a dual approach to general country risk provisioning, which is determined on the basis of a risk rating assigned by the Country Rating Committee using a multi-criteria analysis (economic, financial and political), and another risk weighting assigned per type of commitment. These two criteria determine the contribution of each of the bank's commitments to the global country risk provision.

除了上述在香港分行的減值準備外，海外總行對於一般性債務國風險是根據兩項準則作出撥備。風險評級一方面由內部組成的國家評級委員會在分析經濟、財務、政治等多項因素後作出，而另一方面則按個別風險承擔的類別劃分。這兩項評級標準決定香港分行的每項風險承擔在全球性整體債務國風險準備金內所佔的比重。

Liquidity Risk Management

Liquidity risk is the risk that a financial institution becomes unable to meet its financial obligations as and when they fall due. Credit Agricole CIB Group (covering its Head Office in France and its international network like Hong Kong Branch) could be exposed to the risk of not having sufficient funds to honor its commitments. The risks could for example be realized in events like a mass withdrawal of customer or investor deposits, during a confidence crisis or even a general liquidity crisis in the market (access to interbank, monetary and bond markets).

The Group has devised and implemented liquidity risk management framework, managed at group level and at local level, which relies on four treasury hubs worldwide, amongst which Hong Kong Branch is one of them. Liquidity risk is managed through maintaining liquidity reserves, organizing its funding activities (e.g. limitation on short-term funding, staggered scheduling of long-term funding, diversifying sources of funding) and balanced growth in the assets and liabilities of its balance sheet. A set of limits, indicators and procedures are used to ensure liquidity risks are identified and followed up on timely basis. In addition, the internal approach incorporates compliance with all local regulations on liquidity.

Liquidity Risk Management Governance in Credit Agricole CIB Hong Kong Branch (“CA-CIB HK”)

Assets & Liabilities Management Committee (“ALCO”)

CA-CIB HK ALCO is responsible for the oversight of liquidity risk, including:

- review and monitor the execution of liquidity risk management policies and procedures

CA-CIB HK ALCO meets at least quarterly and it is chaired by CA-CIB HK Chief Executive Officer with permanent members, including Chief Operating Officer, Head of Global Market Division, Chief Risk Officer, Head of Market Risk, Chief Financial Officer, Treasurer as well as Head of ALM. Business lines under Global Finance Division are represented by Chief Executive Officer. The permanent members of ALCO cover all the major business lines / relevant support functions, making sure the policies concerning ALM and financial management are discussed, and decisions and/or practices are communicated.

Similar to the organization at Group level, responsibilities for liquidity risk management in CA-CIB HK are spread across several departments.

- ensure the gaps are covered for different time horizons, by means of liquidity buffers or actions to reduce the balance sheet.
- establish the estimation of regulatory liquidity ratios in normal and stress scenarios.
- Intraday liquidity stress tests applying the three stress scenario for the main currencies, to assess if our HQLA portfolio and funding line is sufficient to cover the maximum intraday stressed outflow.

Contingency Funding Plan (“CFP”)

- Liquidity Crisis Committee is called to address the emergency issue (follow the CFP governance)

- Treasury Department will monitor the short term funding needs, whereby different sources like CD program, deposits from central banks or corporate clients, etc can be accessed. As for MLT funding, the strategy and targets are defined at Head Office level. The monitoring of MLT Gap is performed regularly and presented to the ALCO. ALM Department will address the MLT funding needs by MLT deposits, while adjust dotation (working capital) collected from our Head Office for Risk Weighted Assets purpose.

Funding Diversification

- CA-CIB HK has established a set of funding diversification indicators with thresholds monitored and reported to the senior management on regular basis. The indicators measure proportion of funding from stable funding sources, as well as concentration of the top bank and non-bank client deposits. Target of this monitoring is to ensure a diversified funding source for the Branch.
